2.Designing the structure of the web page

Code used: HTML

The HyperText Markup Language or HTML is the standard markup language for documents designed to
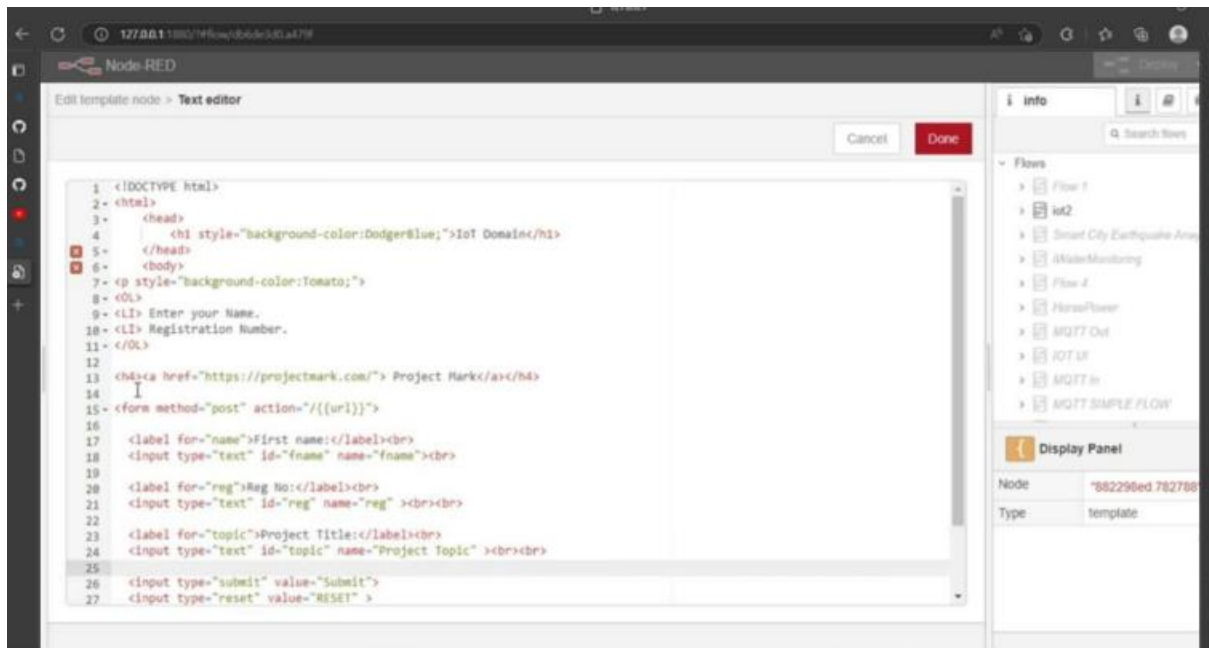

be displayed in a web browser. It can be assisted by technologies such as Cascading Style Sheets and

scripting languages such as JavaScript.

Web template system: Mustache

Mustache is a logic-less templating system. A Mustache template is a text string containing text and tags

that represent data. The Mustache rendering engine takes a template and substitutes the tags with the

data from a given data context.
